Land Use

When land use and transportation are planned efficiently the necessities of daily life can be closer together and easier to access. This promotes walking and biking, reduces congestion and air pollution, and increases human interaction which can make a place more vibrant.

- Mix Land Uses
- Plan Compact Growth in Existing Cities and Towns
- Engage the Community

Transportation

Learn how your community can support multiple modes of transportation. Multimodal options help people access jobs and services, businesses attract customers and talent, and governments save money on infrastructure. They also help make great places possible with cleaner air and water. For example, you will find best practices for planning for all modes, managing travel demand, making streets safe for all users, and improving traffic flow without adding lane miles.

- Implement Demand Management Strategies
- Implement Transportation System Management
- Integrate Planning for All Modes
- Improve Street Network Connectivity
